SPIROCHECK

SP - 831

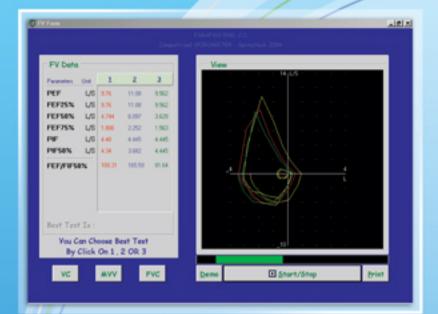

Technical Specifications:

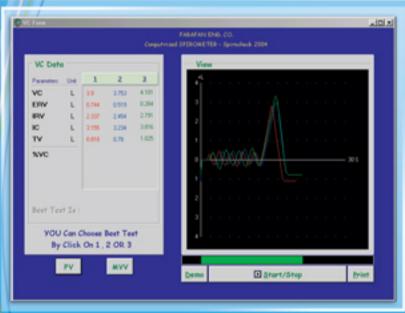

Flow Rate Range : 0-14 I / s Volume Range : 0-8 I

Flow Accuracy : ± 3% or 0.3 l / s

Volum Accuracyl : ± 3% or 50 m

A/D Converter : 12 bit
Sampling Rate : 100 Hz
Computer : P4 or better
Display : 15* LCD
Printer : Color Printer

Interpretations:

- 1- Normal
- 2- Obstructive : Mild, Moderate, Severe and Very Severe
- 3- Restrictive : Mild, Mod erate, And Severe
- 4- Combined

Measured Parameters:

- 1-VC Test:
- VC, ERV, IRV, IC, TV
- 2-FV & FVC Tests:
 - FVC, FEV0.5, FEV1, FEV3
 - FEV1/FVC%, FEV1/VC%, FEV3/ FVC%,
 - FEV3/VC%
 - FIVC, FIV0.5, FEV0.5, FIV0.5
 - PEF, FEF25%, FEF50%, FEF75%
 - PIF, FIF50%, FEF50/FI50
 - FEF0.2-1.2, FEF25-75%, FEF75-85%
- 3-MVV Tests:
 - MVV, R, TV
- The Spirocheck SP-831 is a versatile spirometer combining a sensitive and rugged differential-pressure flow sensor with advanced electronics in a pc-based design.
- User friendly windows environment provides easy operation.
- Real time display of respiratory patterns on display for instant verification.
- . Guides the user how to carry out the test correctly.
- Multiple test results are overlaid in different colors for comparison and choosing the best, manually or automatically by the computer.
- Immediate selection, calculation and interpretation of spirometry results.
- No recalibration required due to use of highly reliable sensor.
- Pre/Post bronchodilator test.
- Up to 30 spirometry indices in the areas of Vital Capcity, Flow-Volume, and Maximum Voluntary Vantilation may be meaured. Open and closed loop tests and overlaying of the test results are possible. SP-831 is capable of selecting the best result, comparing the result with any of ITS, ECCS and IRAN standards (Possibility of selection)printing the results in color.
